DETAILED ACTION

Notice to Applicant

1. This communication is in response to the appeal brief filed 19 July 2010. Claims 4-6, 8, 12, 14-15 have been previously canceled, leaving claims 1-3, 7, 9-11, 13, 16-23 pending.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ana Sarcheck, (Reg. No.57627) on 3 September 2010.

The application has been amended as follows:

- in the preamble and throughout the limitations of claims 1, 11, 17-20 please change all instances of "medical information" to "medical records;" and
- please cancel claim 16.

Allowable Subject Matter

3. Claims 1-3, 7, 9-11, 13, 17-23 are allowed. The following is an examiner's statement of reasons for allowance:

Claims 1-3, 7, 9-11, 13, 17-23 are directed to providing medical records of a vehicle user, including storing an encryption code in a key device associated with a specific vehicle, the encryption code being associated with the user's medical records that are stored in a database, and transmitting the encryption code from the key device to a vehicle storage unit and storing the transmitted encryption code in the vehicle storage unit prior to an emergency event. In response to an emergency event that involves the vehicle, the encryption code is transmitted from the vehicle storage unit to an in-vehicle telematics unit and from the in-vehicle telematics unit to a call center. The encryption code is then transmitted from the call center to emergency personnel, who use the encryption code to access the medical records of the vehicle user from the database.

The closest prior art of record, Rieser et al., U.S. Patent Application Publication Number 2001/0034223, discloses storing an encryption code in a device associated with a vehicle the encryption code being associated with the user's medical records that are stored in a database. Reiser teaches transmitting the encryption code from the device to a vehicle storage unit, storing the transmitted encryption code in the vehicle storage unit prior to an emergency event and transmitting the encryption code from the vehicle storage unit to an in-vehicle telematics unit and from the in-vehicle telematics unit to a call center and transmitting the encryption code from the call center to emergency personnel, however does not disclose or fairly suggest a key that transmits a code, and temporarily storing the transmitted encryption code in the vehicle storage and transmitting the encryption code in response to an emergency event involving the specific

vehicle. Nor does Reiser disclose emergency personnel using the encryption code to access the medical records of the vehicle user from the database.

Tagawa et al., U.S. Patent Number 5949152, teaches a key that transmits a code, and temporarily storing the transmitted encryption code in the vehicle storage, however does not disclose or fairly suggest transmitting the encryption code in response to an emergency event that involves the specific vehicle nor does Tagawa teach emergency personnel using the encryption code to access the medical records of the vehicle user from the database.

4. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement for Reasons for Allowance."
